ZeroEmit

Charge your EV when India's grid is cleaner.

Live grid data
All 5 regional grids of India, every state and ~250 cities

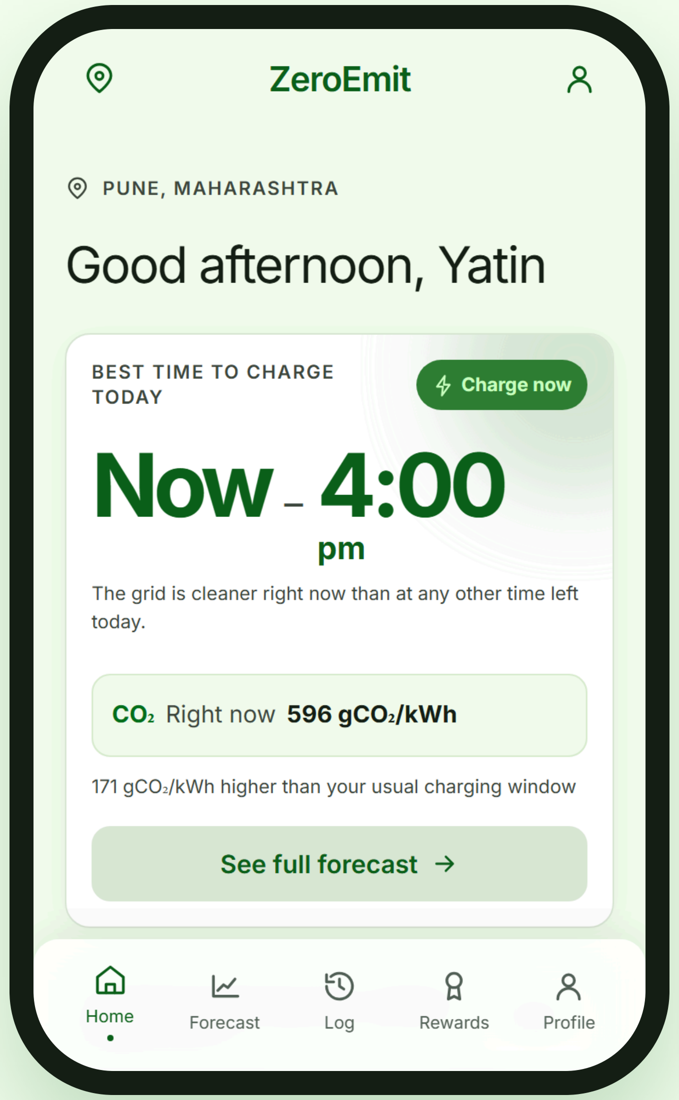
Smart time slots
Best 2-hour windows for today and tomorrow

Rewards
Eco points, streaks, badges and a monthly leaderboard

The problem. The same EV charge can be far dirtier at 8 pm than at noon, because India's grid leans on coal in the evening peak. Drivers can't see this.

Our solution. ZeroEmit reads regional grid carbon intensity, recommends the cleanest hours to plug in, sends reminders, and rewards drivers who shift their charging.

1 Main UI



PUNE, MAHARASHTRA

Good afternoon, Yatin

BEST TIME TO CHARGE TODAY

Now – 4:00 pm

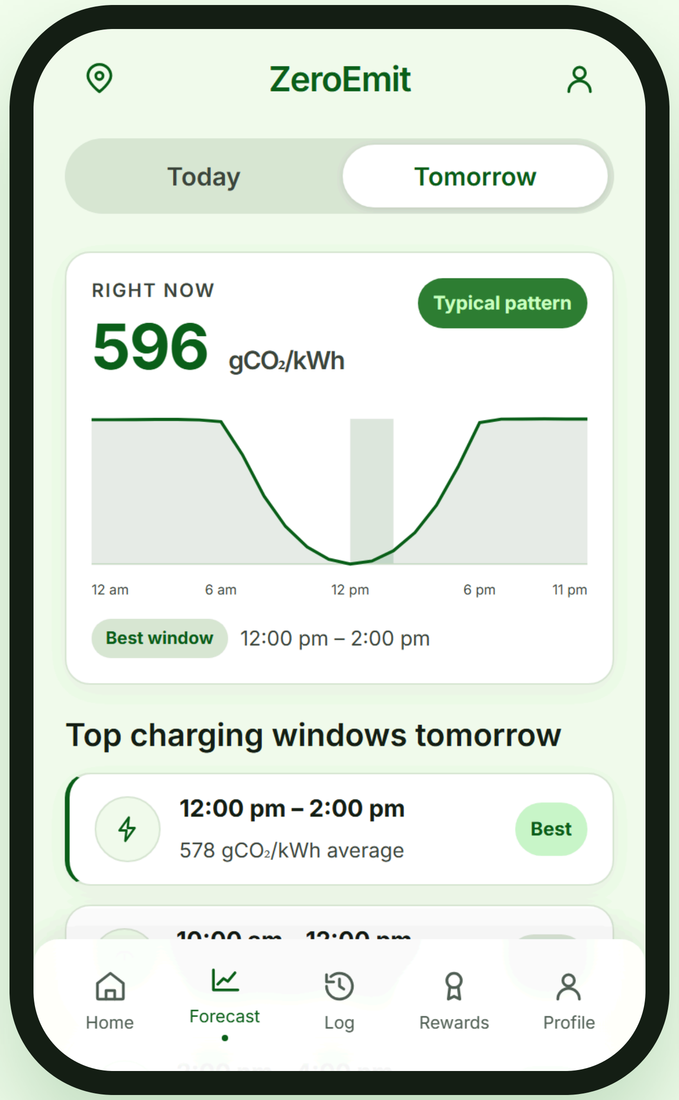
The grid is cleaner right now than at any other time left today.

CO_2 Right now **596 gCO_2/kWh**

171 gCO_2/kWh higher than your usual charging window

Home shows the best time to charge today, the live grid reading and your streak.

2 Time-slot recommendations



RIGHT NOW

596 gCO_2/kWh

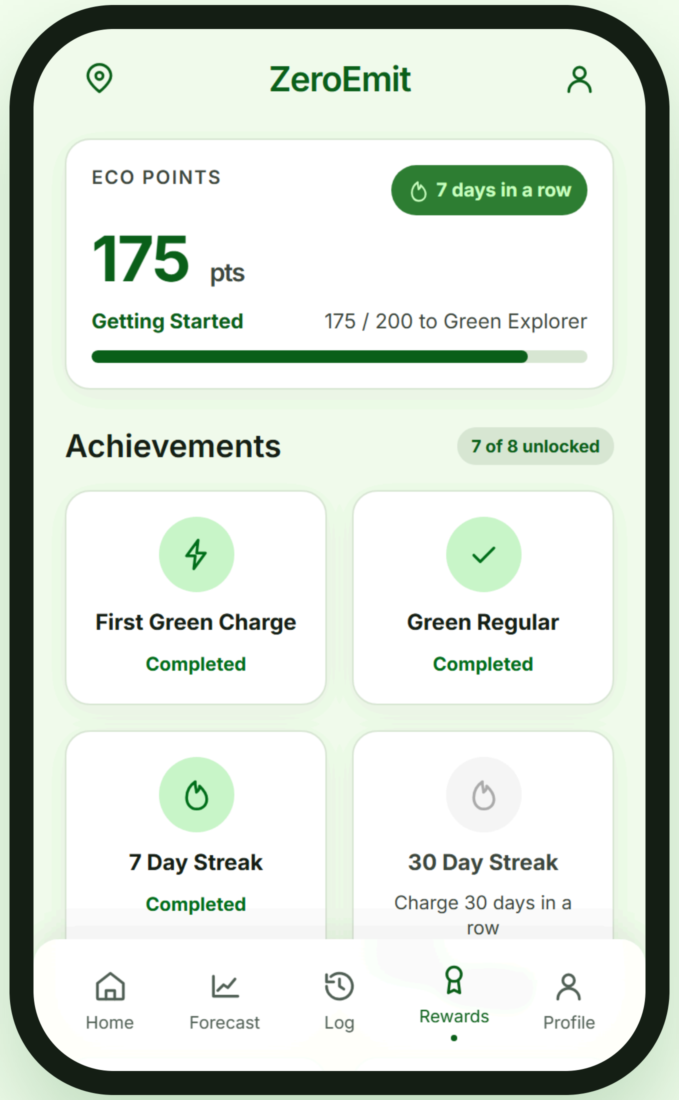
Best window 12:00 pm – 2:00 pm

Top charging windows tomorrow

12:00 pm – 2:00 pm
578 gCO_2/kWh average

Hour-by-hour forecast with the top charging windows for today and tomorrow.

3 Rewards



ECO POINTS

7 days in a row

175 pts

Getting Started — 175 / 200 to Green Explorer

Achievements — 7 of 8 unlocked

First Green Charge — Completed

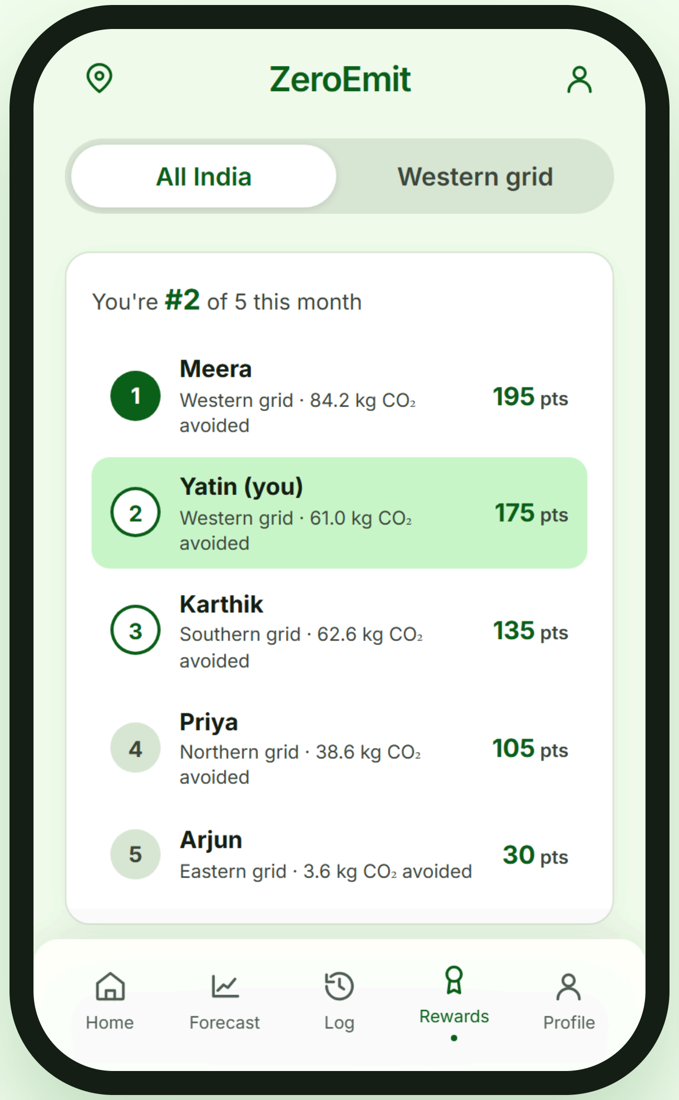
Green Regular — Completed

7 Day Streak — Completed

30 Day Streak — Charge 30 days in a row

Eco points and levels, plus 8 badges with live progress. Green-hour charges earn a bonus.

4 Leaderboard



You're **#2** of 5 this month

1	**Meera** Western grid · 84.2 kg CO_2 avoided	195 pts
2	**Yatin (you)** Western grid · 61.0 kg CO_2 avoided	175 pts
3	**Karthik** Southern grid · 62.6 kg CO_2 avoided	135 pts
4	**Priya** Northern grid · 38.6 kg CO_2 avoided	105 pts
5	**Arjun** Eastern grid · 3.6 kg CO_2 avoided	30 pts

Opt-in monthly ranking, All India or by grid region. Scores are recomputed on the server.
